### **Solutions for display cooking areas**

Halton manufactures state-of-the-art ventilation solutions for nearly 6000 kitchens and galleys a year. We have different solutions available specifically designed for display cooking areas.

### **Halton's ventilated ceilings**

High-profile restaurants have adopted ventilated ceilings in their restaurants mostly due to their modern design, efficiency and aesthetic benefits.

### **Halton – the technology leader**

Halton is the leading galley ventilation provider for cruise ships. We have a track record of successfully delivering our solutions for more than 200 cruise vessels.

Halton has introduced many industry-first solutions to the market like UV-light technology for improved fire safety and hygienic conditions and M.A.R.V.E.L. demand-based ventilation for better energy efficiency.

### **Halton hoods**

Halton high-efficiency hoods are commonly used in front cooking areas such as Teppanyaki restaurants.

### Halton MobiChef

Halton MobiChef is the ultimate tool for flexible cooking onboard. As a fully autonomous unit, it can slide into any required space, enabling instantly ready creative pop-up gastronomy wherever needed. Several sizes and design options are available.

# Sustainability lies at the core of Halton's strategy

## Our Operations to be Carbon Neutral by 2023

At Halton, we want to build a better future by promoting wellbeing and sustainable business. Sustainability lies at the core of Halton's strategy.

### **Halton's Sustainability Vision**

We strive to continuously improve our net impact on the environment and society.

We actively set measurable targets to drive continual improvement towards the United Nation's Sustainable Development Goals.

Our operations, (Scope 1 and 2), are developed to enable us to become carbon neutral by 2023.

We continue to develop robust solutions that help our customers to save energy to be more sustainable.
